

Hi, My name is Joshua Glick. I am 12 years old and I am doing a charity project. I will be raising money for the Golden Retriever Foundation, particularly the Zeke Cancer Research Fund. "Golden Retrievers of all ages are diagnosed with a variety of cancers at alarming rates."

The reason I chose this foundation is because my beloved Winston "Pooh Bear" Glick, a white golden, died from cancer at 5 years old. He was diagnosed with Lymphoma in January and passed away in September. He began chemotherapy and was initially responding well to his weekly treatments. Then he stopped responding well and was no longer able to battle. The heartbreak that my family and I went through was awful and I wish that no human or animal would ever have to suffer that way.

This is why I have chosen to contribute to this fund and there are a few ways to donate and help out. First, I have made dog treats all with the best ingredients. Some are made with sweet potato and some are made with peanut butter and pumpkin puree. I wanted to make different flavors because all dogs deserve to have a treat they enjoy. Please take a dog treat bag and donate what you feel is appropriate.

Additionally, I have set up a GoFundMe page, under Cancer Research for Goldens: <https://www.gofundme.com/cancer-research-for-goldens>.

I will also be raising money by riding my bike 30 miles on January 15th. It would be wonderful and appreciated if you would like to sponsor my bike ride. Please call the number below for more information.

Thank you so much in advance,

Joshua
